

## Cookies

### **What are cookies?**

A cookie is a piece of information in the form of a small text file that is generated and set by our website and placed on your computer's hard drive.

Cookies make your interaction with our website faster and easier. Without cookies, it would be very difficult for our website to remember your preferences or registration details between each web page you use and between each time you visit the site.

They are not computer programs, and they can't be executed as code. Cookies cannot access any information on your computer - so a cookie cannot read any other information saved there such as your email address for example. We do not use cookies for identifying shopping habits or targeting advertising.

We use cookies mainly because they save you time and make your browsing experience more efficient and enjoyable. Without cookies you will have to reset your preferences on each page you visit. We also use cookies to record anonymous statistics on which parts of the website are popular and how many different people visit the site.

To find out more information about cookies generally, visit [All About Cookies](#).
